

BOARD OF TRADE ELECT OFFICERS FOR ENSUING YEAR

The Board of Trade held their annual meeting last week when there was a fair attendance of members. Jack Webb, who has been secretary of the organization for the past year or so was elected president and W. J. McKay vice-president.

Mr. Kery was elected secretary-treasurer. An executive composed of L. Bond and A. W. Gilbert, was appointed to interview the town council about having more sidewalks laid down and generally improve the appearance of the town.

A letter of appreciation was ordered sent to Mr. H. Birch who was actively connected with the board and has moved to Edmonton. It was the intention of the Board to entertain Mr. Birch, but he left so suddenly the Board had no opportunity to do so.

OTTAWA LETTER

BY DR. F. W. GERHSAW

Senator Pepper of Florida addressed the members and was given a real reception. The members rose and gave prolonged cheers when he started. He was pleased by the loud applause and told a story of a farmer who was leading a calf along the road. When he came to a bridge the calf leaped his front legs at an angle of 45 degrees, put its head down and refused to budge for any persuasion.

A motorist came along and thinking he could help, loudly pounded his horn. The calf gave one jump, cleared the railing of the bridge, fell down and was killed on the rocks below. The motorist looked at the farmer and the farmer looked back and said, "I know lumbering to be helpful but that was a hell of a loud toot for so small a calf."

Speaking of the war he said, "We Americans have, during the long years, worked out a world which seemed right to us, and under God, it shall be our work to show to the whole world knows that we cherish peace and what we have done to assure it, to preserve it. But we are a sensible people. We know that nothing is safe, neither life nor property if international brigands, bent on loot, are allowed to run loose and stop at nothing. If force is to be the criterion, then all that sweat and tears and blood have built up in the past will be lost."

"No knights of old were ever braver or more gallant than those boys who left their classrooms a few months ago and have now saved the world in the clouds. No heroes were ever more noble than those women who sent their offspring away while they stayed to carry on and to provide the supplies to protect and heal the wounds of the injured. Such courage no pitiless power can break."

He praised the Canadian war effort and assured us that the long years of friendship would remain unbroken. He ended with this quotation from a great American: "Now that men have cleared away I believe that men will see the truth and eye to eye and face to face. There is one thing that American people always rise to and that is the truth of justice and of liberty and of peace. We have accepted that truth and we are going to be led by it and it is going to lead through the world out into pastures of quietness and peace such as the world never dreamed of before."

As much of the war activity had to be kept more or less secret, the impression got abroad that it was not extensive enough. The ministers have furnished books and pamphlets full of detail for days and weeks now and the false impression has been corrected and now the opponents of the government are convincing themselves as being satisfied with the effort.

Conclusions formed on incomplete information often bring regrets to

THE BRITISH NAVY'S "ARK ROYAL" STILL UNHURT—The British Navy's aircraft-carrier Ark Royal, frequently falsely claimed by German propaganda to have been sunk is seen on a recent sweep by the British Fleet through the Mediterranean. Aircraft from the Ark Royal are seen operating from her flying deck.

DROP YOUR SCRAP IRON ON BERLIN AGENTS' SLOGAN

"Drop your scrap iron on Berlin" will be the slogan of a drive sponsored by local line elevator agents in which farmers will be asked to donate their scrap iron to aid Britain.

Plans are now underway for organizing every community for collection of scrap iron in Western Canada. Local Boards of Trade, weekly newspapers, church societies, farm organizations and all local associations will be asked to co-operate in the drive for collection of waste scrap iron. Its ultimate destination will be Germany via British bombers.

In this manner, farmers will be enabled to give direct reply for the bombing of British cities. The North West Line Elevators' Association has arranged with all line elevator agents to act as collecting agencies for scrap iron. The preliminary organization for each community will be set up during the next two weeks and actual collection and shipment will take place between June 15 and July 15. It is felt that this date will best fit in with farming operations.

The only expense to be incurred in organization of the "Drop your scrap iron on Berlin" campaign will be freight charges. The entire proceeds other than freight costs will be turned over to the Patriotic Salvage Corps.

OBITUARY

Mrs. Harriet Rousche, wife of Mr. Rousche, died Wednesday at a Calgary hospital following a lengthy illness, at the age of 47 years.

Mrs. Rousche was born at Beaver, Idaho and came to Gleichen with her parents some 33 years ago and has resided here ever since. She is survived by her husband, one son, Lee of Vancouver; one daughter, Mrs. Davenport, and her mother Mrs. C. H. Gleichen, one brother, Henry Lee, two sisters, Mrs. C. Kilgus, Portland, Ore., and Mrs. Davidson, Pocatello, Idaho.

Funeral services were held in Calgary Saturday afternoon, with Bishop M. H. Picher of Latter Day Saints conducting the service. Burial was in Burnside cemetery. The pall bearers were Messrs. G. Bell, O. Desjardine, W. Riddell, R. B. Hayes, J. A. MacArthur and W. McKinnon.

The person who made the heavy decision. Members are quite within their rights in probing into every detail of war activity. One member made the charge that the lumber for Debert military buildings was purchased from an insurance agent. The effect that only one per cent of the 20 million feet was bought from an insurance agent and that was because his prices were lower than others and because he could make deliveries promptly and up to specifications. Mr. H. R. MacMillan, the timber controller, took full responsibility for this and other activities that were mentioned and denied that politics had anything to do with war contracts.

WAR SERVICE FUND COMMITTEE NOW READY FOR ACTION

Extract from a letter received from one Gleichen boy over there. The letter was dated Feb. 8, 1940 and his name will be given on request:

"I wish to thank the citizens of Gleichen for their kindness in sending me the 300 cigarettes. Cigarettes are a very useful gift these days especially over here."

The stationary used for the above letter bore the crest of The Knights' Colonious War Services Overseas Service, one of the six great organizations established to assist and encourage Canada's fighting men that they may give of their best, their skill and their lives. These boys depend on you, through these organizations and the generous support of the public of our country to establish in Canada and overseas including actual theatres of war such services as the following:

- 1. Educational services, and religious services.
- 2. Entertainment, motion pictures, etc.
- 3. Sports, recreation huts, canteens, stationary and mobile.
- 4. Note paper and envelopes.
- 5. Club houses and libraries.
- 6. Newspapers and magazines.
- 7. Tea wagons and canteens.

Who pays for this work? The answer is simply this: The warm hearted people of Canada, whose faith in the Canadian War Service ability to care for their soldier sons was so magnificently demonstrated in February 1940 shaking for funds.

The fight goes on. World shaking events have written terrible pages of blood and suffering in the history of humanity. Nations after nations have been trampled under the German heel, but Britain still stands, fearless, undaunted and unflinching, confident that with the help of her Empire and her allies, the Nazi and Fascist barbarians will be conquered and the world will again be made free.

A drive is now on in Canada to raise \$5,500,000 for the Canadian War Service Fund. The Canadian Legion, Salvation Army, Knights of Columbus, Y.M.C.A., Y.W.C.A. and the I.O.O.F. are all combining their efforts to raise the above amount.

An executive committee has been set up in town under the chairman-ship of T. C. Kerr, manager of the Canadian Bank of Commerce, with representatives of the Canadian Legion, Salvation Army, Board of Trade, U.F.W.A., and the Blackfoot Municipality. These members of the local committee visit every household in the town in the next few days, assist them to the best of your ability to do a job so that Gleichen will not be on the bottom of the list.

Mark that Cash will help most, but a lot of farmers are hard pressed they may not have the cash to lend, but cash wheat will be accepted in place of money, and will not effect the quota.

We Shall not Flag or Fail. Give

THE WORLD OF WHEAT

BY H. G. L. STRANGE

A key of unusually clear logical and rational thinking about the international wheat industry recently illuminated the minds of the people of Winnipeg.

Dr. Joseph S. Davis, director of the famous Food Research Institute of California, and who is a renowned authority on marketing of wheat, made a series of addresses. Dr. Davis put forth the following views, which I for one believe, should be most seriously pondered over by our wheat growers and by all Canadians.

1. That it is an advantage to have large reserves of wheat during the course of the war.
2. That the future of the Canadian wheat industry will depend upon the kind of peace that will be made.
3. That there is no hope for any betterment of conditions, or for increased sales either by governmental planning or by international wheat marketing agreements.
4. That the true hope for wheat is in the lowering of tariffs and in the removal of restrictions, quotas and agreements which have strangled international trade; all to open the way to freer world trade, and so to increased world consumption of bread.
5. That the last two decades of Nationalism, Self-Sufficiency and planned Mismanagement, and the restriction of foreign imports, will be regarded as a crazy interlude in the economic progress of mankind.

THE RUM ISSUE

The Gleichen river went on its

annual flood Saturday afternoon, for several hours. As usual the Chinese laundry and restaurant proprietors had a whale of a time keeping their stock from getting wet. Saturday's flood was not so extensive as usual. The ladies who are unable to attend local Civic sewing on Monday afternoons may do so those evenings at 8:15 o'clock.

An ad is found principally in a newspaper formation. It varies in size according to the deposit. When found in profusion it is a sign that the country is in a state of push, prosperity and public spirit. When only a trace shows in the press you can bet that the country is broke, or else the business men are dead without knowing it, and have neighbours too lazy to promote a funeral—Ez.

FARMERS BEWARE!

Examine All Stored Grains Regularly for GRAIN MITES

Toughness and moisture in first 2 feet of grain are signs of mite infestation.

Act promptly if mites are present. Provide good ventilation for all bins. Transfer grain from one bin to another. Clean grain and burn screenings. Examine screenings for further infestation.

If mites are present they will be found on the screenings obtained from ultimate samples of grain. A magnifying glass to examine dust at house temperatures.

Further information may be obtained from the District Agricultural, Animal Elevator Agent, Dominion Entomological Branch, Lethbridge, or the Field Crops Branch, Edmonton.

The Wheat Surplus Problem

With the approach of another season of seeding, farmers of Western Canada are facing a serious problem, perhaps one of the most serious problems they have ever had to face since the plow was first put into the virgin soil of the prairies. It can be summed up in a single question: "How many acres shall I seed to wheat this year?"

The question is not a new one. It crops up every season and each time it has to be faced, it has to be considered and reconsidered in the light of so many unknown factors that it is always a new question to answer. This year it is fraught with even greater complexity, due to a very large surplus accumulated and at present undisposable and other factors attributable to the exigencies of a state of war.

One of the greatest of these unpensable, of course, is the duration of the war. How long is the war going to last before Hitler and Nazism are crushed? If one had the power of occult vision and could peer into the future, one of the unknowns could be translated into a definite question to answer. This year it is fraught with even greater complexity, due to a very large surplus accumulated and at present undisposable and other factors attributable to the exigencies of a state of war.

It is the duty and the function of the Western Canadian farmer, as his contribution towards the war effort to provide enough wheat to feed the fighting forces of Great Britain and Canada and the civilian populations of both countries. To date this obligation is not only being met to the full but has been exceeded so magnificently that there is now a full year's crop or more in storage, after deducting for all the needs that result in increased acreage sown to wheat since the war started and a good all round yield. The question the farmer now has to ask himself is whether he should continue to increase his wheat acreage, permit it to remain stationary or to reduce it.

Farming Needs

While prudence seems to demand wheat sowing on smaller scale, the farmer is haunted by the possibility that the war might collapse suddenly and that what now seems a tremendous surplus might melt like snow under a hot summer sun to feed a hungry Europe.

On the other hand, if the war is protracted, and some of the highest authorities, including Winston Churchill, predict several more years of conflict, the wisdom of continuing to pile surplus upon surplus is open to question.

Apparently the great majority of the people of this country, including the farmers themselves are willing to accept the prediction of a lengthy war, and so far, even to the theatre of war, the farmer has been able to hold his ground and there is a general feeling that the time has arrived when the brakes should be put upon wheat production, in moderation. The farmers themselves, as a body, appear to have come to this conclusion.

Assuming that there is general accord on the premise that a reduction in wheat acreage is advisable, the farmer is next faced with the question: How is it going to be achieved and what shall be done with the idle acreage?

The farmers, and their organizations without exception, have decided that there must be no compulsion in the matter. They have stated unanimously that wheat acreage should be reduced by voluntary means. In other words, by so doing, they have stated, in effect, that it is a problem which must be decided by the individual farmer for himself. This means, of course, that although there is no compulsion of plan, one farmer may reduce his wheat acreage 10 or 20 per cent., another may reduce 50 or more per cent. The only alternative would be for the farmers to come to an agreement among themselves, through their own organizations, to a general percentage reduction, but it is doubtful whether that would be practicable.

Other Considerations

However, when the individual farmer has decided to what extent he shall reduce his wheat acreage, he is faced with the question of the manner in which the excess acreage shall be utilized. Shall it be seeded to other cereal crops, shall a larger percentage of the farm be summer-fallowed, shall some of it be seeded to forage crops or grass for pasturage, or some or all of these purposes? Here, again, the problem can only be solved by the individual farmer who is faced with the question of the manner in which the excess acreage shall be utilized. Shall it be seeded to other cereal crops, shall a larger percentage of the farm be summer-fallowed, shall some of it be seeded to forage crops or grass for pasturage, or some or all of these purposes? Here, again, the problem can only be solved by the individual farmer who is faced with the question of the manner in which the excess acreage shall be utilized.

A useful lead in this direction was given recently by the Saskatchewan minister of agriculture when he pointed out that a dangerous condition exists in the agricultural world, that is, the world-wide increase in livestock and fanning for their families. He pointed to the importance of every farmer who raises livestock, having a year's supply of feed in reserve as an insurance policy against such a contingency. For many farmers in all three prairie provinces, the livestock industry has been reduced to be made in wheat acreage and at the same time would be a wise precaution.

Gardens in England

Consider The Ant

In Spite Of War People Still Will Have Their Flowers

A Central Ontario bulb grower has received an order from England for a large quantity of gladioli. It was for 75 varieties in lots of hundreds and thousands, and the recipient of the order had to call on dozens of growers in the district to help him fill it.

The head of the English firm sending the order appended this paragraph: "Although bombs may be spoiling our homes, we still are busy with our gardens. We are still carrying on. There will always be an England, and a floral one as well. People who can think of gladioli when bombs are nightly visitors are to be admired. The Ontario growers—some of them from The Netherlands—say they are proud to be able to fill this order."—Ottawa Journal.

One species of fish makes its home inside the body of another marine animal, the sea cucumber.

There are about 25 species, including 350 varieties, of woodpeckers in the United States.

Amazing Episode

Real Story That Ranks With Fictional Epics Of The Sea

The sea stories of Melville, Conrad and McPhee together contain no more amazing episode than that of the Windsor Castle.

Last November, according to one of her passengers, the Windsor Castle, two days out of Glasgow, was attacked by Nazi bombers. There was a direct hit with a 500-pound bomb, which crashed down through her super-structure. For awful seconds the passengers watched as the ship went down to the engine room, lay silent, grim, menacing. It did not explode.

Nobody aboard knew how to remove the fuse. Nobody knew what minute, and then the deadly thing might tear the ship to splinters. And for two days the ship drifted at anchor, the passengers standing by the lifeboats, the engineers nursing their mighty engines with instant death at their elbows. None knew at what point a further explosion, a jar or concussion might bring the explosion. For two days passengers watched the ship drift at anchor, the engineers nursing their mighty engines with instant death at their elbows. None knew at what point a further explosion, a jar or concussion might bring the explosion. For two days passengers watched the ship drift at anchor, the engineers nursing their mighty engines with instant death at their elbows.

Then Glasgow was sighted, and experts came hurrying out to render the bomb harmless. Only a master shock at which a second explosion would have real episode rank with all fictional epics of the sea.—New Service.

Warble Flies

The Campaign Against These Pests Is Under Way

The farmers of Western Canada have suffered great losses through Warble Flies and these losses could be reduced or eliminated very easily by the use of Warble Fly Powder. The Saskatchewan Department of Agriculture is putting on a campaign to reduce these losses. This campaign requires the co-operation of the owners and the municipal authorities.

And needless loss. The Warble flies cause cattle to lose weight and to become weak. These stockmen who actually visit tanneries and leather warehouses and inspect the hides. The best of the hide, that is, the section along the back, is ruined, and consequently cattle buyers pay from two to five cents less for a hide than they would pay for one that is not so ruined. The Warble flies cause cattle to lose weight and to become weak. These stockmen who actually visit tanneries and leather warehouses and inspect the hides.

Prevention is the long through the hide, there is also the discomfort and pain caused to Warble infested cattle. When a cow gives milk, the milk is full of Warble flies and the milk is full of Warble flies and the milk is full of Warble flies.

The Warble Fly powder is a simple, effective, and safe method of controlling Warble flies. It is a simple, effective, and safe method of controlling Warble flies. Establish Training Centres

New System Of Training For The Canadian Army

Defence Minister Ralston gave an outline of the new system of training schools for the Canadian army in the House of Commons yesterday.

It embraces 88 instructional schools and involves the consolidation of the active and reserve army training centres which formerly operated separately. The reserve army training centres, 39 in number, were set up when compulsory training was introduced last summer.

He summarized active training centres as follows: Artillery, 4 engineers, 2 signals, 1 armored corps, 2 infantry, 7 machine gun, 2 army service corps, 2 ordnance, 1 and army medical corps.

"This tabulation shows a total of 22 instructional centres," said Col. Ralston. "Then, in addition to that there is a unit area training centre, two officers training centres, two technical training centres, making a total of 34 basic training centres, which, added to the 22 active training centres make a total of 56. Then, there are two instruction schools, making 58 in all."

The active training centres included Winnipeg, an advanced artillery training centre; Brandon, an artillery training centre; Dundas, basic engineering centre; Calgary, infantry training centre; Dunsmuir, machine gun training centre.

Red Deer, Alta., army service corps training centre; Nanaimo, B.C., small arms school training centre; Victoria, officers training centre. Col. Ralston said these were advanced training centres. There also were two training centres for coast defence and anti-aircraft, and there will be officers training centres for Canada.

He listed the following among basic or elementary training centres: Portage la Prairie, Port William, Vernon, Hinton, Camrose, Grand Prairie.

More than 30,000 Canadians have been through the Livestock Branch in putting on a campaign to reduce these losses. This campaign requires the co-operation of the owners and the municipal authorities.

And needless loss. The Warble flies cause cattle to lose weight and to become weak. These stockmen who actually visit tanneries and leather warehouses and inspect the hides. Using Traffic Lanes

How U.S. Officials Think Nazi U-Boats Will Operate

Predicting the pattern of Germany's spring sea offensive against British shipping, authorities at Washington said that each one of the scores of submarines employed probably would be assigned "lane" with roles within neighboring but distinct areas of the sea.

They expressed belief that the tactics now employed by the German, and destined to be used with increasing force when the weather improves, follow this outline:

The sea around Britain is divided by the German navy's high command into "traffic lanes," each a mile to five miles wide and paralleling one another.

Each "lane" is then divided into sections, and each section assigned to a certain submarine. Within its allotted territory, each submarine is free to operate more or less independently.

When a large enemy convoy approaches, the first U-boat to detect it does not attack the leading ship but waits until a number of vessels have been across neighboring submarine lanes.

Then several of the submarines attack different ships simultaneously. Estimate place the number of German U-boats in service last month at 120. An additional 180 were believed under construction.

Donations Have Been Liberal

Lord Beaverbrook, minister of aircraft production, announced gifts or the purchase of airplanes now exceed \$10,000,000 (\$44,500,000). It was announced that after March 31 it is proposed to devote 10 per cent. of the money sent in to benevolent funds of service charities of three fields: services and the merchant navy.

He listed the following among basic or elementary training centres: Portage la Prairie, Port William, Vernon, Hinton, Camrose, Grand Prairie.

More than 30,000 Canadians have been through the Livestock Branch in putting on a campaign to reduce these losses. This campaign requires the co-operation of the owners and the municipal authorities.

STOP BABY'S SNIFFLES

Don't let baby suffer from colds, coughs, and sneezes. Follow without delay the advice of a doctor and give your baby a little of this medicine. It is the only medicine that brings quick relief of mucus from the nose and throat.

Buy a box, take or jar of Mentholum today from your nearest drug-gift.

MENTHOLUM

GOES COMFORTABLE

Suggested Lincoln's Name

But President Said He Favored Editor For Doing It

One day the editor of a small weekly newspaper called at the White House, and told Mr. Lincoln that he was the first name to suggest for the Presidency, producing an editorial from a frayed copy of his paper.

"Do you really think you started the ball rolling?" asked Lincoln. "Absolutely," replied the editor. "The suggestion was so opportune that it moved other papers to advocate your selection, and as a result you were nominated and elected."

"Remembering an appointment at the War Department, Lincoln signed deeply, and made the editor good-bye. "You feel too badly about what you have done," he said. "I forgive you."

Most interceptor planes climb at 4-6 degree angle.

BUTTERMILK BRAN PAN BREAD IS POPULAR FOR LATE BREAKFAST OR SUNDAY SUPPER PARTY

| | |
|--------------------------|---------------------------|
| 2 tablespoons shortening | 1 cup buttermilk |
| 1 cup sugar | 1 1/2 cups flour |
| 1 egg | 1 teaspoon salt |
| 1 cup all-bran | 2 teaspoons baking powder |

Blend shortening and sugar thoroughly; add egg and beat until creamy. Add all-bran and buttermilk; let soak until most of moisture is taken up. Sift flour with salt, baking powder and soda, and add to first mixture stirring only until flour disappears. Pour into greased pan and bake in moderately hot oven (425 degrees) for about 20 minutes. Cut into squares and serve while hot.

Note: Raisins may be added; use 1/2 cup raisins to each cup flour.

New Variety Of Alfalfa

University Of Alberta Announces Result Of 17 Years Research

A new variety of alfalfa has been developed at the University of Alberta after 17 years of research work, it was announced by Dr. J. R. Fryer, professor of genetics in the field crops department.

The new variety called "femax" is a high seed producer, thereby reaching a long-sought goal because present varieties of alfalfa are "notoriously feeble as seed sowers," said Dr. Fryer.

So far, 30 pounds of femax have been produced in the university field plots and this has been distributed to six Alberta growers who are under contract to plant the seed in an effort to grow enough for much wider distribution next year.

The effort to develop a better seed producer began in 1924 when 25 varieties of alfalfa from various parts of the world were planted here. From this union the best seed producers were culled, and by a process of careful selection the present seed was developed.

The new variety has been licensed by the federal seed branch.

No Long Words

Fitting Tributes Paid To The Hon. Winston Churchill

One of the results of having the Rt. Hon. Winston Churchill as British Prime Minister in time of war is the rapid rediscovery that in English language is capable of expressing great thoughts and inspiring world-wide action.

Mr. Churchill's words are long words. It might be argued that Mr. Churchill would be a great man even if his speeches were unreadable. But this might not be the fact for the kind which is capable of stripping thought to simple words is a mind which can grasp great problems by casting away non-essential detail.

The power of Mr. Churchill to give free people of the earth is the power of forthright honesty of purpose. He probably would not be so great if he had been so tongue-tied in public, apparent elsewhere, to use words for concealment, rather than the expression of thought. The Printed Word.

Aerial Etiquette

Must Observe The Rights Of People Who Have Their Feet On

It will not be many years before the air surrounding towns and cities will be alive with planes and combat.

By flying develops with clean sportsmen as pilots, such as character the service at present, there will be no undue annoyance and the first rules of etiquette to teach in the school of aviation is to respect the rights and the safety of the people who still have their feet on the land—Gulph Mercury.

Should Be Appreciated

Hotel In London Favors Service For Men Without Homes

A hotel for lonely husbands, where they can get their socks darned, their suits pressed and two hot meals a day, has been opened at Hoxton, in London's bombed east-end.

For husbands and young working men whose homes were broken up by the war, the hotel is the first provided by the London Hospitals' Association.

As the London Hospitals' Association spoke at the opening, amenities include hot showers, toilet facilities for each of the 20 men who will be accommodated, reading, writing and games rooms, a radio, and, in addition to the hot meals, special care for the men to take to work. The fee is £1.45 (£1.45) a week.

Headaches Cause

Neurologists at Cornell University Medical College have discovered what causes the pain in headaches and the resulting dilatation of the arteries of the head. They have made a headache map. It shows the source of migraine, of high blood pressure headaches, of fever head pain. It is a new key for trying remedies.

Herman Goering claims to be descended from the Plantagenet line of English kings. But then, most famous of all, the British monarchs that should be graced off.

In England, books about World War I are still being published at the rate of 500 a year.

The Men Who Travel

Provide Valuable Information To Their Countries In War Time

Glamor girl spies who tried to be the Marie Hays of this war have taken a back seat behind plain John Businessmen, case espionage agent of 1941.

Which is why counter-espionage officials of neutral governments say they believe Britain now has a big edge on Germany in military information.

Britain's trade empire is paying dividends with perhaps the world's most active intelligence agents—businessmen, manufacturers, technicians and industrialists of many countries whose pre-war income was based on trade with British firms.

War or no war, those men travel. We need their brains and war machines are made of what they have to sell. No matter how tightly a frontier may be "sealed," the man who has what the government needs that frontier walls will always be able to pass.

Then he may go back again to his home. He may go directly to a British (or German) friend—perhaps a diplomat, perhaps a businessman, perhaps a social acquaintance. He tells of industrial bottlenecks in war production in the country he comes from, the factory secrets he has picked up, perhaps he has been surprised and perhaps he isn't when he reads in the newspaper a few days later that the same factory has been bombed.

All belligerents use these commercial spies to the fullest possible extent. A commercial man who outlined the picture estimated that at least half the information handed by military intelligence in London came from commercial sources or through commercial channels.

Canada's Oil Reserve World's Largest Known Oil Deposit Lies In Northern Alberta. Canadians generally do not realize the Dominion possesses the greatest oil reserve in the world, Max Ball of Edmonton says.

The Canadian Institute of Mining and Metallurgy at Montreal, which has the world's largest known oil deposit lies in northern Alberta, and the famous so-called "tar sands" of the Athabasca region contain several times as much oil as the United States proved reserves of the world," said Ball, president of the Abasand Oil Ltd., of Edmonton.

Generalissimo Chiang Kai-Shek, of China, recently urged all civilians to take rigorous physical exercises every day and perform manual labor to harden the muscles.

CHIEFMENTRY MEETS TO TRAIN CANADA'S STUDENT BOMBERS By C. F. C. Downman, Editor C.I.-O. Vol.

All parts of the practice bomb training through the small practice bombs. On ground targets, bomb practice bombs have eleven-and-a-half inch diameter, and are fired from 500 to 2,000 foot projectiles used in actual warfare, and are the latest type of accurate "target ammunition" of the bomb.

New Type Barrage Balloon

Has Lethal Wires And Can Fly At Higher Altitudes

Col. J. Llewellyn, parliamentary secretary to the ministry of aircraft production, told the British House of Commons that a new type of barrage balloon has been developed.

"We believe in keeping the balloons lethal so that if an airplane hits them the almost inevitable probability is that it will be brought to ground," Col. Llewellyn said.

Major Victor Canfield, Conservative member of parliament, said that the possibility of flying balloons at even greater height. He said that in France some had flown to the height of 30,000 feet.

Col. Llewellyn said these French balloons only went to 15,000 feet.

The British balloon was not lethal.

The Cheshire Cheese

Damage Caused By Fire Will Take Months To Repair

The following is part of a London letter to the Hamilton, Ont. Spectator: Thousands of Canadian visitors to London have visited and perhaps lunched at the Cheshire Cheese, the ancient inn of Fleet street. It has been burned out. But not this cheese by the Nazi. It had a very ordinary accidental fire devoid of all "blitz" association. It was burned out in the Great Fire of London in 1666.

It was some months before it was restored and put into use again. Newspapers frequented it in numbers, except when, during the war, the lack of sleep and the curious visitors who wanted to see the chair in which, so Dr. Samuel Johnson thought, Shakespeare died, and also the visitors' book. The parrot, successor to a more famous bird, was rescued after the fire from the cellar where he hid, the most other Londoners, gone for shelter. He whistles, rather than swears, as his predecessors used to do.

The Cheshire as Fleet street called it, retained all its ancient character. It had high-backed box pews, sawdust on the floor, long churchwarden pipes, electric lighting that looked like anything but what it really was, and a notice on the outside of the door reading: "Customers are requested to mind the step which is part of the antiquity of the house and shows use for centuries by frequenters."

London's Civilian Guards Work All Day And Are Prepared For Night Calls

J. Norman Lodge, in Toronto Daily Star, says: The home guards patrol the lack of sleep and the curious visitors who wanted to see the chair in which, so Dr. Samuel Johnson thought, Shakespeare died, and also the visitors' book. The parrot, successor to a more famous bird, was rescued after the fire from the cellar where he hid, the most other Londoners, gone for shelter. He whistles, rather than swears, as his predecessors used to do.

The Cheshire as Fleet street called it, retained all its ancient character. GEMS OF THOUGHT

Books are standing counsellors and preachers, always at hand, and always disinterested; having this advantage over oral instructors, that they are ready to repeat the lesson as often as we please.—Chambers.

The colleges, while they provide us with libraries, furnish no books. The book is the only thing that is so much needed.—Emerson.

Be as careful of the books you keep for your habits and character will be as much influenced by the former as by the latter.—Paxton Hood.

The book to read is not the one which you think. No book in the world equals the Bible for that.—James McCoach.

The Bible is the learned man's dictionary, the ignorant man's dictionary, the wise man's dictionary.—Mary Baker Eddy.

No book can be so good as to be printed when negligently read.—Seneca.

Wanted To Know Answer

Partially Solved Crossword Puzzle Worried British War Workers

Four war production workers in London, Staffordshire, England, solved the Cincinnati Enquirer for the correct answer to a crossword puzzle published in its edition of last Sept. 8.

The Britons found the paper packed around a machinery shop. "We have endeavored to solve the puzzle during those short periods from time to time when it is deemed advisable to adjourn from our labors," they wrote, enclosing the partially worked puzzle.

"If it be possible we should be glad to learn just what 'meat is roasting on a skewer' and why?" The Enquirer's solution to the puzzle is that "meat roasting on a skewer" is kabob, also known as city chicken.

Russia's Farms Mechanized

Russia claims that its farms are rapidly becoming mechanized.

A private source says that of the 500,000 tractors, nearly 170,000 harvester combines and 200,000 trucks are operated on the fields of the Soviet Union. Their total capacity is 27,000,000 horsepower.

Would Be Some Melon

A farmer of Hope, Arkansas, has an ambition which many people will applaud. He wants to grow a watermelon which will feed 100 people. He has already grown 200 melons weighing from 140 to almost 200 pounds.

The sports pages make much of the fact that certain baseball "stars" are holding out, which seems particularly inconsequential in view of the war in which the British All-Stars are holding out across the Atlantic.

Port Bliss is located at El Paso, Texas.

CANADA'S CROWN BRAND FOODS CROWN SYRUP

LOOK OUT FOR YOUR LIVER

Back it up right now and feed like a miller!

Your liver is the largest organ in your body and most important to your health. It pumps out to digest food, gets rid of poisons, and stores up the energy you need to reach your goals. When your liver is weak, you feel sluggish, tired, and your health begins to decline.

For every 100 pounds of body weight, you need 100 grams of liver. That's a lot of liver! And it's the only organ in your body that can't regenerate itself. So if you don't take care of it now, you'll have to live with the consequences later.

Look out for your liver! It's the only organ in your body that can't regenerate itself. So if you don't take care of it now, you'll have to live with the consequences later.

Look out for your liver! It's the only organ in your body that can't regenerate itself. So if you don't take care of it now, you'll have to live with the consequences later.

For the things that are not given to a fighting man with his uniform... things that are not part of his military equipment... things of the spirit... Canada's fighting sons, wherever they may be, rely on you. The Government provides them with uniforms, rifles, ammunition, but for comforts—recreations and wholesome opportunity to make their precious moments of leisure a genuine home... they rely on you. Of course you help to buy airplanes, guns, ships, tanks—but for the things that express to the soldier the affection and thoughtfulness of the folks back home... he relies on you. Six great national organizations labour unceasingly to provide him with these things. They can do it only with your money. Your money started this work—your money is needed to carry it on. The need is urgent. Be generous. Let the volunteer helper who calls on you carry back your pledge of fullest support for our fighting men.

Town & District

T. H. Beach recently purchased the garage opposite the town office and at the present time Messrs. Reid and Kelly, local carpenters are busy repairing the building. Mr. Beach will use the place for his implement business.

So far all signs point to spring with the warm weather of the past week the snow has disappeared, the roads in town fast drying up and the frost coming out of the ground. The past winter has been an exceptionally mild one. It almost compares with the mild winters we "used to have."

Mrs. J. E. Ostrander was pleasantly surprised last Friday afternoon when a number of friends gathered to extend their congratulations on the occasion of her 74th birthday. The tea table centred with a birthday cake and daffodils was presided over by Mrs. Beach. Mrs. McPhee on behalf of the friends present, presented Mrs. Ostrander with a gift and bouquet of roses. In responding to the presentation Mrs. Ostrander paid tribute to the many kindnesses offered during her long residence in Gleichen.

FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

G. Yule is ill with inflammatory rheumatism.

While playing ball Alex McMuller was unfortunate to break his wrist.

Dax James is said to be recovering nicely from a surgical operation in Calgary.

J. E. Ostrander has been appointed shipper for the Gleichen Egg Circle. The Board of Trade entertained the Fire Brigade at a happy luncheon. After a small budget of business had been disposed of by the Board, President Matthews asked Chief W. Walsh to take the chair who introduced an excellent program of songs, speeches and musical selections. It was announced that Cappy Smart of Calgary had accepted an invitation to visit Gleichen and address the fire brigade.

Sam Brown is reported to be very ill having undergone two operations within a week. One was for a rupture and the other appendicitis.

Peter McLean, town clerk, spent last week in Edmonton looking after town business.

"This week—all clothing half off," states an advertisement in a city paper. The ad writer must have had in mind the way some of our dancers dress.

The first public entertainment given by the pupils of the Gleichen School of Agriculture proved a most decided success. The assembly hall was filled to capacity. The artists were Messrs. M. Watson, M. Sim and I. Lawrie, and Messrs. D. Gray, H. Corbell and Phillips. In the other play Misses A. Corbell and I. Lawrie and Mr. Leaboy system has not maintained the nitrogen... or organic matter content of western Canada, prairie soils.

Mr. and Mrs. Lou Michael have returned from a couple of weeks visit to Vancouver.

Earl Tudhope, the local C.P.R. freight agent has returned from a trip to California.

Mr. and Mrs. Hugh Bates have returned from their honeymoon and their friends gave them a welcome back that rivalled an artillery attack.

Thos. Naylor announces that he is selling out and giving up farming.

When bootleggers commence stealing whiskey from each other, then look out for trouble. Last week a certain bootlegger secured two cases of whiskey at Calgary which he brought down in valises. Fearing police intervention he cashed the whiskey in a certain place which was found by another bootlegger, who had an eye open for business and who later sold some of the liquor to the original owner, who asserted in his testimony that it was a mighty poor brand of moonshine.

THE RUM ISSUE

attack us all the next year. So "in the meantime, in between time isn't we get fuel?"

Picking up the old bit of gossip around the army camps it seems that quite a number joined the reserve, or militia as it was formerly called simply to evade the call for compulsory training. One unit called for recruits when its mobilization order came through and only twenty out of a full complement of men responded and they were all old veterans. Only five were accepted and we understand they had to be released as they were getting near the dead line for age.

You have all heard the suggestion made that all families living in what is commonly called "p" dry land, be moved away and the land allowed to go back to prairie. The country between Redway and Enchant is in this

category. There are some men in the Veterans Guard at Seebe from here and this is their story for whatever it is worth. They say that the main advocates of the migration scheme are the mortgage companies. They own a quarter of more in practically every section. The government had an irrigation scheme which would have given nearly everyone land under water to grow. The main ditch was put through long ago by the Canada Land Co. Its farmers were required to put in their own ditch, which many of them did but the mortgage companies refused to allow any ditches to cross their land and so blocked the whole project. The soldiers say that if the mortgage companies could get the rest of the settlers moved out or starved out that they could then obtain possession of all the land and put in the irrigation themselves and so make another Vauxhall or the like and a handsome profit on the land they got for small loans.

An English hospital set aside on ward of beds for German aviators brought down. 34 beds were filled when a German was put in the room but the Unconquered for some hours he at last came to and yelling "Spitfire! Spitfire!" passed out again. He did the same thing five or six more times. The nurse went to the matron and said "must be relieved. That last German who was put in the room last night was yelling 'Spitfire!'." The matron said "The man is just raving. Surely you can stand it. The night nurse would say 'Yes, but that isn't what is setting me down. Everytime he yells Spitfire I have to change the other 34 beds'."

Lights Out!

Dr. K. W. Neathy
Director, Agricultural Department
North-West Line Elevators Association

Will Soil Wear Out?
The answer is definitely yes, unless present methods of crop production are altered.

Four years ago, the Department of Soils of the University of Alberta made a study of the nitrogen and organic matter contents of cultivated lands and neighbouring virgin soil at 32 widely separated points in Saskatchewan and Alberta.

In this study, the four major soil zones (black, dark brown, brown and gray) were all represented. It was found that, as a result of cultivation, the black soils had lost 18% of the original nitrogen and 21% of organic matter. The dark brown soils lost 22% of nitrogen and 26% of organic matter. The loss in brown soils amounted to 20% of the nitrogen and 27% of the organic matter. The gray soils, naturally less fertile than the others, were found to have lost 35% of the original nitrogen and 40% of the organic matter.

The above figures were obtained from analysis of the surface six inches of soil. In general, subsoil losses of nitrogen were slight, but organic matter losses considerable. The authors state (Scientific Agriculture, Vol. 19) that "... it is clear that the nitrogen and organic matter system has not maintained the nitrogen... or organic matter content of western Canada, prairie soils."

Have you any news to tell the editor or if so he will be glad to publish it. In case you do not happen to meet him on the street use the telephone or the mail. You will be helping make the local paper of greater interest and thereby serve the general community. Whatever news may interest you, must surely interest others.

CLASSIFIED ADS

Notice under the heading 30 words or under 50c. first line and 5c. each subsequent insertion 3 weeks \$1.00. Over 15 words one cent per word for each line.

LOST—Bright bay colt 3 years old, 2 white hind legs half way white, white stripe on face and branded "W" on right hip. \$10.00 reward. Apply John Koeford.

FOUND NOTICE

Notice is hereby given under Section 22 of The Domestic Animal Act (Municipalities), the Municipal District of Blackfoot, No. 218, has appointed William Sanders, as pound-keeper, and has appointed George A. Saunders of Nanaka, Alberta, as poundkeeper with pound located on the South-West corner, Section 16, Township 25, Range 23, West of the Fourth Meridian. Notices will be posted at the pound and at Nanaka Post Office.

Dated at Gleichen this 21st day of March 1941.
W. E. THOMPSON, Sec.-Treas.
M. D. of Blackfoot, No. 218.

LIST OF SOLDIERS ENLISTED FROM THIS DISTRICT

Each week for several weeks past more names have been added to the list below. This goes to show that there is a steady flow of men from this district to join up.

- H. Boos.
- R. Riddell.
- J. Daverton.
- J. McAllen.
- C. Kilcup.
- Major W. E. Taylor, 109 Bat. R.C.A.
- Major E. Brown, M.M. O.C., Anti-Tank Battery.
- Lieut. J. Cook, 109 Bat. R.C.A.
- C. O. Phillips, R.C.A.
- W. Hill, R.C.A.
- H. Bogart, R.C.A.
- W. E. Bogart, R.C.A.
- T. Maars, R.C.A.
- W. Schmidt, R.C.C.S.
- Geo. Souter, R.C.A.S.C.
- V. Anglin, R.C.A.S.C.
- A. Peacock, R.C.A.S.C.
- J. Bogart, R.C.A.S.C.
- J. Gregory, R.C.A.S.C.
- C. Boos, R.C.A.
- Woods, R.C.A.
- J. Willis, R.C.A.
- J. Bloch, R.C.A.
- John Bell, Calgary Highlanders.
- G. Guthrie, Calgary Highlanders.
- E. Evans, Calgary Highlanders.
- Guthrie, Seaforth Highlanders.
- W. Dejaridine, R.C.A.
- McHugh, R.C.O.C.
- McHugh, R.C.O.C.
- J. Walker, R.A.P.
- J. Walker, R.A.P.
- James Plant, R.A.P.
- J. Bremner, R.C.A.M.C.
- Al Jones, Engineers.
- E. Evans, R.C.A.P.
- C. McLeod, R.C.A.P.
- W. MacCallum, R.C.A.P.
- J. House, R.C.A.P.
- J. Clifford, R.C.A.P.
- E. Michael, R.C.A.P.
- J. Riddell, R.C.A.P.
- J. Dejaridine, R.C.A.P.
- J. W. Nicholas, R.C.A.P.
- J. Dejaridine, R.C.A.P.
- J. Richards, R.C.A.P.
- J. Dejaridine, R.C.A.P.
- J. Moore, R.C.A.
- R. Downey, R.C.A.M.C.
- J. Bogart, R.C.A.P.
- J. Grant, Petrol Co. R.C.A.S.C.
- R. Sheets, R.C.A.S.C.
- J. Sheets, R.C.A.S.C.
- J. Fairburn, R.C. Navy.
- W. Thornburn, R.C. Navy.
- A. Bremner, Provost Co.
- Moss, R.C.A.
- P. Moss, R.C.E.
- M. Moss, R.C.C.S.
- W. Service, Home Guard.
- F. W. Jones, Home Guard.
- Enlisted in 22nd-75th Battery, R.C.A.

- E. E. Lester.
- R. C. Clifford.
- E. T. Woods.
- M. W. Murray.
- W. Jones, R.C.A.
- V. E. Jennings.
- L. R. Thornburn.
- N. Francis.
- R. Taylor.
- S. Barnabach.
- S. Brown.
- O. Fogstrom.
- G. V. Newell.
- L. Davenport.
- J. G. Nell.

QUEENSTOWN ENLISTMENT

- W. Oiler, Jr., R.C.A.
- W. Payne, R.C.A.
- Gr. S. Brown, R.C.A.
- Tom James, R.C.A.
- C. McLaughlin, R.C.A.
- S. McDermid, R.C.A.
- O. Lehd, R.C.A.
- E. Kingstith.
- S. Schultz, R.C.A.
- John James, R.C.A.S.C.
- D. Clemmons, R.C.O.C.
- W. Strum, R.C.O.C.
- G. Laid, R.C.E.

EDMONTON SPRING STOCK SHOW

APRIL 7-10
SINGLE FARE FOR ROUND TRIP
(MINIMUM FARE 25 CENTS)
(From Station in Alberta)

APRIL 5-10
Except where no train service April 5, tickets will be sold April 4.
RETURN LIMIT
APRIL 14, 1941
